PROFILE

Performance-driven backend developer specializing in the Laravel ecosystem. Expert in architecting scalable, role-based, and transaction-heavy web systems — from database schema design to real-time communication. Proven track record across eCommerce, fintech, and SaaS platforms.

EXPERIENCE

Laravel Web Developer — Independent / Project-Based

January 2022 – Present

- Architected and deployed multiple production-ready systems with clean code and DRY principles.
- Managed full SDLC — requirements gathering, database modeling, and server deployment.
- Optimized backend performance, reducing query response times for high-traffic applications.

KEY PROJECTS

Nexus Platform — Investor & Entrepreneur Collaboration

Laravel · MySQL · Socket.IO · WebRTC · Stripe · JazzCash

- Engineered a multi-tenant RBAC system with secure, separate dashboards per user role.
- Built real-time chat and video conferencing using WebRTC and Socket.IO.
- Automated meeting scheduling with multi-step approval logic and notification triggers.
- Developed a custom financial ledger tracking deposits and transfers via Stripe and JazzCash.

eCommerce Platform — Marketplace-Ready System

Laravel · MySQL · Blade · JavaScript · Bootstrap

- Designed a marketplace architecture supporting multi-tier categories and brand management.
- Implemented a custom order lifecycle engine with real-time inventory synchronization.
- Built a centralized admin portal for media, user, and transaction auditing.

News Portal — High-Traffic Content Management

Laravel · MySQL · SEO Optimization

- Developed a publishing engine with SEO-friendly routing and dynamic metadata.
- Engineered a scalable content model maintaining stability during traffic surges.

SKILLS

Backend

■ Laravel ■ PHP ■ RESTful APIs ■ Sanctum ■ JWT

Database

■ MySQL ■ MongoDB ■ Indexing ■ Query Opt.

Real-Time

■ Socket.IO ■ WebRTC ■ File Handling

Fintech

■ Stripe ■ JazzCash ■ Ledger Mgmt

Frontend

■ JS ES6+ ■ AJAX ■ jQuery ■ Blade ■ Bootstrap

Security

■ RBAC ■ Policy Perms ■ CSRF

Tools

■ Git ■ Postman ■ Docker ■ Linux

STRENGTHS

Modular Architecture

Decoupling auth, payments & communication for maintainable systems.

System Security

CSRF protection, secure validation, and robust session management.

Performance

Optimized queries and async processing for high-load scenarios.

LEARNING

- Redis Caching
- Laravel Queues
- Worker Processes

EDUCATION

COMSATS University

Islamabad

Bachelor of Computer Science
(BSCS)
